

CHIEF'S COMMITTEE

Avery Fire Association - June 4, 2105

The regular monthly meeting of the Chief's Committee was called to order by Chief Bob Garland at Fall Creek Station one.

Mark Taylor reported that Bill Beuttell was checking references on Innovapad and would then be meeting with the county commissioners to ask for the required ordinance.

Paul Buchanan reported that the Beech Mtn Metric bicycle race went off very well.

Bob Garland agreed to check with Melissa on the Mayland Tech Burn Building repair progress.

Jim Brooks met with Jamie Johnson and was able to finally resolve all I Am Responding issues. Bob asked members to record the exact date and time of any future problems with the system.

He also asked members to provide a current member roster with I.D. numbers and current truck numbers using the correct series of numbers: Pumpers - 200 series, tankers - 300 series, brush trucks & ATV's - 400 series, Equipment trucks - 500 series, and QRV's 600 series

Bobby Powell noted that more foam needed to be purchased. Bob Garland asked each department to review their stock of foam so the needed amount could be determined at the next meeting. He also reminded members that they must sign out all foam removed from the Ladder Company stock.

Kennie McFee brought up a problem with the county insurance coverage. One of his members pulled his back on a call. He said John Hall told him that Worker's Comp would not cover back injuries. Members thought that we might need to see if there was extra coverage available to fill the gap.

Members discussed the problems Stanly Jordan and his family were having and decided to bring it up at the Association meeting.

There being no further business, the meeting was adjourned.
